Business Question and Visualization Report

Date	28-10-2026
Team ID	en25cs3010371
Project Name	Electric Vehicle Market Analysis Using Tableau
Maximum Marks	5 Marks

Visualization development refers to the process of creating graphical representations of data to facilitate understanding, analysis, and decision-making. The goal is to transform complex datasets into visual formats that are easy to interpret, enabling users to gain insights and make informed decisions. Visualization development involves selecting appropriate visual elements, designing layouts, and using interactive features to enhance the user experience. This process is commonly associated with data visualization tools and platforms, and it plays a crucial role in business intelligence, analytics, and reporting

Business Questions and Visualisation

The process involves defining specific business questions to guide the creation of meaningful and actionable visualizations using data stored in Snowflake. Well-framed business questions help identify the required metrics, determine the appropriate Snowflake tables or analytical views, select relevant data, and create visualizations that provide useful business insights.

Sample

1. **What are the monthly sales trends?**
   - *Code*
   - *Screenshot of visualisation*
2. **Which products have the highest revenue?**
   - *Code*
   - *Screenshot of visualisation*
3. **How is customer satisfaction varying across regions?**
   - *Code*
   - *Screenshot of visualisation*
